MANAGEMENT DISCUSSION AND ANALYSIS REPORT (forming part of Board's Report)

a. Industry structure and Developments

The IT and ITeS industry is divided into four major segments - IT services, Business Process Management (BPM), software products and engineering services, and hardware. The world wide IT-BPM spent in 2015 was US\$2.3 trillion including hardware. Over the next decade, 80% of incremental expenditures may be driven by digital technologies, such as cloud-based applications, big data analytics, mobile systems, social media and cyber security, as well as services needed to integrate these technologies with remaining legacy core technologies. Information technology (IT) industry is India's largest private sector employer employing about 3.7 million people . India which commands around 67 per cent of the US\$ 124-130 billion market is the world's largest sourcing destination for the IT Industry. The industry has led the economic transformation of the country and altered the perception of India in the global economy. India is also gaining prominence in terms of intellectual capital with several global IT firms setting up their innovation centres in India.

The Government of India has launched the Digital India program to provide several government services to the people using IT and to integrate the government departments and the people of India. The adoption of key technologies across sectors spurred by the 'Digital India Initiative' could help boost India's Gross Domestic Product (GDP) by US\$ 550 billion to US\$ 1 trillion by 2025, as per research firm McKinsey.

The Government of Telangana has begun construction of a technology incubator in Hyderabad-dubbed T-Hub-to reposition the city as a technology destination. The state government is initially investing Rs 35 crore (US\$ 5.14 million) to set up a 60,000 sq ft space, labelled the largest start-up incubator in the county, at the campus of International Institute of Information Technology-Hyderabad (IIIT-H). Once completed, the project is proposed to be the world's biggest start-up incubator housing 1,000 start-ups.

The IT-BPM sector is expected to grow at a Compound Annual Growth Rate (CAGR) of 8.3 per cent year-onyear The sector which accounts for more than 45 per cent in total services export in 2015-16 is expected to contribute 9.5 per cent of India's Gross Domestic Product (GDP)

India, the fourth largest base for new businesses in the world and home to over 3,100 tech start-ups, is set to increase its base to 11,500 tech start-ups by 2020, as per a report by NASSCOM and Zinnov Management Consulting Pvt Ltd.

b. Opportunities, Threats Risks and Concerns

India is the topmost off-shoring destination for IT companies across the world. Having proven its capabilities in delivering both on-shore and off-shore services to global clients, emerging technologies now offer an entire new gamut of opportunities for top IT firms in India. Social, Mobility, Analytics and Cloud

(SMAC) are collectively expected to offer a US\$ 1 trillion opportunity. Cloud represents the largest opportunity under SMAC, increasing at a CAGR of approximately 30 per cent to around US\$ 650-700 billion by 2020. The social media is the second most lucrative segment for IT firms, offering a US\$ 250 billion market opportunity by 2020. The Indian ecommerce segment is US\$ 12 billion in size and is witnessing strong growth and thereby offers another attractive avenue for IT companies to develop products and services to cater to the high growth consumer segment.

Section 80 JJAA now applicable to services companies as well, is a boost for BPM companies who have been at the forefront of creating employment. Extensive emphasis on technology adoption by the government across SMBs, land record modernization, Aadhar adoption, procurement platforms etc. Startup India announcement of 3 year income tax exemption welcome, though continuing MAT imposition a dampener

The alarming trend of increased protectionism and resulting barriers to free movement of skill and data poses a challenge to the IT-BPM sector in its global journey. Misconstruing mobility of skilled people as an immigration issue is a deterrent to the growth of this global business.

The government has been actively supporting the sector, it being the key partner in the various flagship programmes of the government like Digital India, Make in India, Skill India, E-governance and Startup India. Software products with 4.5 per cent year-on-year growth are the fastest growing segment in the Indian market, expanding on the back of demand for mobile app development, security software, system software and customer analytics products and increased adoption of software as a service (SAAS) and cloud.

The Indian technology startups landscape has seen tremendous growth to move towards innovative startups. India, home to a new breed of young start-ups, has clearly evolved to become the third largest base of technology start-up in the world. Start-ups in India are spread across the digital (social, mobile, analytics and cloud), high-tech (augmented reality, internet of things, robotics) and vertical domains (edu-tech, health-tech, fin-tech, ad-tech) that are identifying whitespaces and delivering domain-specific solutions. This emerging sector is set to get a fillip with the Startup India Programme.

The company received some proposals to acquire companies/business and on due diligence did not find them suitable. During the year the management members visited the present clients at the US and were assured of continued business for the foreseeable future and they were satisfied with the quality of the company's delivery of services. They also networked with young entrepreneurs in the US for more offshore work.

Management's Responsibility for Internal Financial Controls

The Company's management responsible for establishing and maintaining internal financial controls base on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating

effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditors' judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted

accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

- Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion the Company has, in all material respects, an adequate internal financial control over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
